Each Warp must be 3 times the length of the finished project. Prepare string on disk for loading beads. Load beads as follows for a 7" braid

- Warp A - 47 W
- Warp B - 23 B ~ 24 W
- Warp C - 2 3 B ~ 24 W
- Warp D - 23 B ~ 24 W

Starting with warp A, weave your bracelet and tie off the end(s). Glue your end caps and attach your clasp. Let dry overnight. Now Enjoy!

If you need to make your bracelet longer, add seed beads on each end of bracelet on each warp. To make shorter, delete beads from each end of bracelet on each warp.

For size 8 beads there are about 6.7 beads on each warp for each finished inch
